Pre-Anesthesia Blood Testing Consent Form

Like you, our greatest concern is the well-being of your pet. Before putting your pet under anesthesia we will perform a full physical examination. However, many conditions, including disorders of the liver, kidneys, or blood, are not detected unless blood testing is performed. Such tests are especially important before any kind of surgery. For this reason, we highly recommend blood screening before such procedures. **For pet's age 8 and older, pre-anesthesia bloodwork is required.**

Our Hospital is fully equipped and staffed to perform these important blood tests. Results will be available to examine before anesthesia and/or surgery. Please indicate your choice below.

Pet's Name

Pet's Age

Yes, I want my pet to have a pre-anesthesia blood test

No, I do not want my pet to have a pre-anesthesia blood test.

My pet is age 8 or older and I agree to pre- anesthesia bloodwork.
